

Privacy Policy — Time Capsule

Welcome to **Time Capsule** (“we”, “our”, “the platform”). We are committed to protecting your privacy, safeguarding your personal data, and ensuring the security of your digital identity. This Privacy Policy explains in detail how we collect, use, process, store, and protect your information when you access or use our platform available at <https://timecapsules.xyz>. By using the platform, you acknowledge that you have read, understood, and agree to the terms described in this Privacy Policy.

Time Capsule operates at the intersection of artificial intelligence and digital identity, which means that the nature of the data we process may go beyond traditional personal information and include behavioral, cognitive, and interaction-based data. We approach this responsibility with a high level of care, implementing both technical and organizational measures to ensure that your data remains secure and under your control.

We may collect various types of information in order to provide and continuously improve our services. This includes personal information such as your name, username, email address, and wallet address, as well as account-related data required for authentication and communication. In addition to this, as part of the core functionality of the platform, we collect and process content and behavioral data that you voluntarily provide. This may include written inputs such as notes, reflections, responses to system prompts, voice recordings where applicable, decision-making inputs, and patterns of interaction within the platform. These data points are essential for enabling the system to analyze your behavior and build a structured representation of your personality.

We may also automatically collect technical data related to your usage of the platform. This includes your IP address, device type, operating system, browser information, and usage logs that help us understand how users interact with the platform. This information is used strictly for improving system performance, ensuring security, and optimizing user experience.

The data we collect is used for several key purposes. Primarily, it enables us to create and maintain your digital capsule, which serves as the foundation of your digital identity within the Time Capsule ecosystem. Additionally, your data is used to train and refine artificial intelligence models that are responsible for analyzing behavioral patterns and reproducing decision-making logic. We also use this information to personalize your experience, enhance system functionality, communicate with you regarding updates or support, and ensure compliance with applicable legal and regulatory requirements.

A fundamental principle of Time Capsule is that you retain full ownership of your data and your digital identity. We do not claim ownership over the content you provide, the models generated from your data, or any intellectual output derived from your activity. You have full control over your information, including the ability to access, modify, export, or request deletion of your data at any time. Our role is to provide the infrastructure and tools necessary to manage and utilize this data, not to take ownership of it.

We take data security seriously and implement industry-standard measures to protect your information. This includes encryption of data both in transit and at rest, secure authentication systems, role-based access controls, and continuous monitoring of our infrastructure for potential vulnerabilities. We regularly update our security protocols to address emerging threats and ensure the integrity of the platform.

Artificial intelligence is a core component of Time Capsule. The platform uses AI technologies to analyze user inputs, identify patterns, and construct behavioral models that reflect individual thinking processes. This processing is conducted solely for the purpose of improving your personal digital model and enhancing platform functionality. We do not use your data to train unrelated third-party models without your consent.

We do not sell, rent, or commercially distribute your personal data to third parties. However, in order to operate the platform, we may share limited data with trusted service providers such as hosting infrastructure providers, analytics services, and technical partners. These third parties are bound by strict confidentiality obligations and are only permitted to use the data as necessary to provide their services. We may also disclose information if required to do so by law, legal process, or to protect the rights, safety, and integrity of the platform and its users.

Time Capsule may use cookies and similar tracking technologies to enhance user experience and analyze platform usage. These technologies help us understand user behavior, improve performance, and deliver a more personalized experience. Users have the ability to manage cookie preferences through their browser settings.

The platform may also integrate with third-party services such as cryptocurrency wallets or external analytics tools. While we carefully select our partners, we do not control their privacy practices and encourage users to review their respective policies.

We retain your data for as long as your account remains active or as necessary to provide the services described. If you choose to delete your account, we will take reasonable steps to remove your data from our active systems, unless retention is required for legal or security purposes.

Depending on your jurisdiction, you may have specific rights regarding your personal data. These rights may include the ability to access your data, request corrections, request deletion, restrict processing, or withdraw previously given consent. We are committed to supporting these rights and providing transparent mechanisms for exercising them.

Time Capsule is not intended for use by individuals under the age of 18, and we do not knowingly collect personal data from minors. If we become aware that such data has been collected, we will take appropriate steps to delete it.

We reserve the right to update or modify this Privacy Policy as the platform evolves. In the event of significant changes, we will notify users through the platform or official communication channels. Continued use of the platform after such updates constitutes acceptance of the revised policy.

If you have any questions, concerns, or requests related to this Privacy Policy or your data, you may contact us at:

 <https://timecapsules.xyz>

Time Capsule represents a new technological paradigm that combines artificial intelligence with digital identity modeling. While we take all reasonable measures to ensure data protection and system reliability, users acknowledge that the platform operates within an evolving technological landscape and agree to use it with an understanding of its innovative

nature.
